PROFILE / OBJECTIVE

Dedicated Computer Science and Engineering student passionate about software development and web technologies. Experienced in developing responsive websites and academic projects, with strong analytical, problem-solving, and teamwork skills. Eager to contribute to real-world projects while continuously learning and growing as a technology professional.

EDUCATION

Bachelor of Technology in Computer Science and Engineering – Jorhat Engineering College
July 2026
• CGPA: 7.74

10 CBSE– Jesus Mary School, Bijni
July 2020
• Percentage: 90.4%

12 CBSE Science – Sai Vikash Vidya Niketan, Guwahati
July 2022
• Percentage: 88.6%

SKILLS

• Technical Skills: Python, JavaScript, C, C++, Flutter, frontend web development, Machine Learning Basics

• Core Skills: Problem-solving, Teamwork, Communication, Software Development

• Tools/Platforms: Flutter, Flask, Firebase, Supabase, AWS Cloud, GitHub, Postman

EXPERIENCE

Student Intern – Indian Institute of Science (IISc Bangalore)
11 August 2025 – 21 August 2025
• Gained practical knowledge of semiconductor fabrication processes, CMOS technology, and VLSI fundamentals.
• Participated in technical sessions and workshops on chip design, semiconductor devices, and industry applications.
• Developed an understanding of India's semiconductor ecosystem and emerging trends in semiconductor engineering.

Student Intern –Indian Oil Corporation Limited, Bongaigaon Refinery, Dhaligaon, Chirang, Assam (IOCL Bongaigaon)

Jun 2025 – July 2025

• Gained hands-on exposure to IT infrastructure, network systems, and information management processes in a refinery environment.
• Assisted in understanding enterprise applications, system maintenance, and technology- driven operations supporting refinery activities.
• Learned industrial safety practices and the role of information systems in ensuring efficient and secure refinery operations.

GET at _VOIS

Oct 2026 - Present

• Currently working as GET at _VOIS.

ACADEMIC PROJECTS

• Final Year Main Project – ML-Based Early Detection of Tea Leaf Diseases
Built an ensemble-based tea leaf disease detection system by integrating outputs from five ML microservices.
Enhanced prediction accuracy and reliability through model aggregation techniques.

• Financial advisor app – Mini project
Developed an Android application using Android Studio to help users manage personal finances based on the 50/30/20 budgeting rule. Implemented features for income allocation, expense tracking, and savings recommendations to promote better financial planning.

• E-commerce Restaurant website
Designed and developed the frontend of a restaurant e-commerce platform with features including menu display, shopping cart, user login, and online food ordering functionality.
